PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of experience building enterprise and banking systems in regulated, high-availability environments. Strong backend foundation in Java, Spring Boot, RESTful APIs, and microservices, complemented by modern frontend development with React, Next.js, and TypeScript. Hands-on delivery at major Thai banks including SCB, TTB, and UOB, shipping production-grade, scalable services through CI/CD pipelines with a focus on reliability, code quality, and clean architecture. Effective in Agile teams across the full SDLC, from API and database design through responsive user interfaces.

TECHNICAL SKILLS

Languages	Java, TypeScript, JavaScript, SQL
Frontend	React, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3, Responsive Design, Thymeleaf
Backend & Frameworks	Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST API, SOAP, Microservices
Databases	PostgreSQL, Oracle DB, SQL Server, MySQL
DevOps & Cloud	Docker, Kubernetes, Jenkins, GitLab CI/CD, Vercel
Testing & Quality	Unit Testing, Integration Testing, E2E Testing, SonarQube, Code Review
Tools & Practices	Git, GitLab, Bitbucket, IntelliJ IDEA, VS Code, Postman, Jira, Agile/Scrum, Distributed Systems

PROFESSIONAL EXPERIENCE

Software Development Engineer — HITACHI (Outsource, On-site SCB) Bangkok, Thailand | 2025 – Present

- Developed and maintained backend services using Java and Spring Boot for core banking systems handling high daily transaction volumes across multiple business units.
- Improved slow API performance under peak load by optimizing database queries and introducing caching, cutting average response time by roughly two-thirds.
- Containerized and deployed services with Docker and Kubernetes, supporting multiple microservices and reducing manual deployment effort.
- Built and maintained CI/CD pipelines in Jenkins and GitLab, enabling more frequent, reliable releases and shortening the release cycle.
- Enforced code quality through code reviews, unit tests, and SonarQube within an Agile/Scrum process, keeping unit test coverage high.

Tech: Java, Spring Boot, REST API, Jenkins, GitLab, Docker, Kubernetes, SonarQube

Software Development Engineer — The Prodigy (On-site TTB Bank) Bangkok, Thailand | Nov 2024 – Jun 2025

- Built enterprise banking applications end to end using Spring Boot on the backend and JavaScript with Thymeleaf on the frontend for payment and account-management modules.
- Developed scalable APIs and background workers for payment processing, sustaining high transaction throughput with strong service availability.
- Implemented responsive, interactive UI components and integrated them with backend services to deliver complete user-facing features.
- Participated in CI/CD, pull requests, and Unit / Integration / E2E testing to ensure release stability.

Tech: Java, Spring Boot, JavaScript, Thymeleaf, REST API, CI/CD

Software Development Engineer — KGISL (On-site UOB Bank) Bangkok, Thailand | Jan 2024 – Jun 2024

- Designed and developed high-volume, low-latency Java applications to meet demanding peak-load requirements.
- Analyzed business requirements and translated them into technical solutions in collaboration with stakeholders.
- Supported the full SDLC from design through production support.

Tech: Java, Spring Boot, REST API, SQL

Software Development Engineer — AIS Bangkok, Thailand | Jun 2023 – Dec 2023

- Developed scalable backend services using Spring Boot for telecom billing and subscriber-management systems.
- Implemented REST and SOAP APIs for integration with internal and third-party systems.
- Supported SIT, UAT, and integration testing to ensure release readiness.

Tech: Java, Spring Boot, REST API, SOAP

Software Development Engineer — Kerry Express Bangkok, Thailand | Oct 2021 – May 2023

- Developed and maintained enterprise web applications supporting nationwide parcel-tracking and logistics operations.
- Diagnosed recurring production issues in legacy systems and refactored the problematic modules, noticeably reducing repeat incidents and improving system stability.
- Collaborated with operations and QA teams to translate logistics requirements into reliable features, championing clean code and maintainability across the codebase.

Tech: Java, Spring Boot, SQL

EDUCATION

Bachelor of Science in Computer Science — Prince of Songkla University
